

whiteboardphoto™

Perfect whiteboard
and flipchart
printouts with
your digital
camera!

"Wow! As an instructor, Whiteboard Photo has saved me hours transferring whiteboard lecture notes to printed and electronic media."

Paul Zebell
Instructor

"I can make slides for the next meeting from the notes at this meeting. Meeting minutes are a snap!"

David Stubbs
Usability Architects, Inc.

"Very functional and incredibly clever."

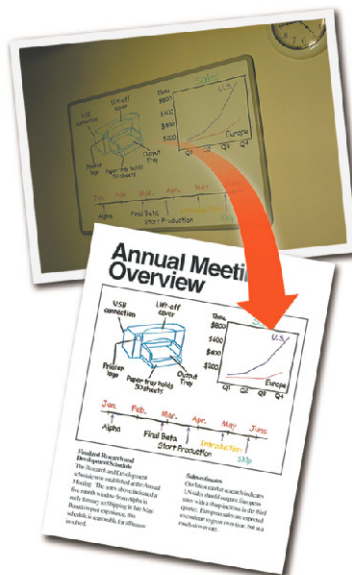

Tom Cocklin, CHFP
Systems Human Factors
Hewlett-Packard Corporation

Introducing Whiteboard Photo™ software.

Simply snap a digital photo of any whiteboard, flipchart, or chalkboard, and load it into your PC. Whiteboard Photo™ automatically transforms even dark, distorted photos (above) into crisp, full-color, professional-quality printouts (below), in less than 30 seconds.

No more expensive electronic copyboards.

Ensure accuracy and save time with
Whiteboard Photo.

 **pixid™**

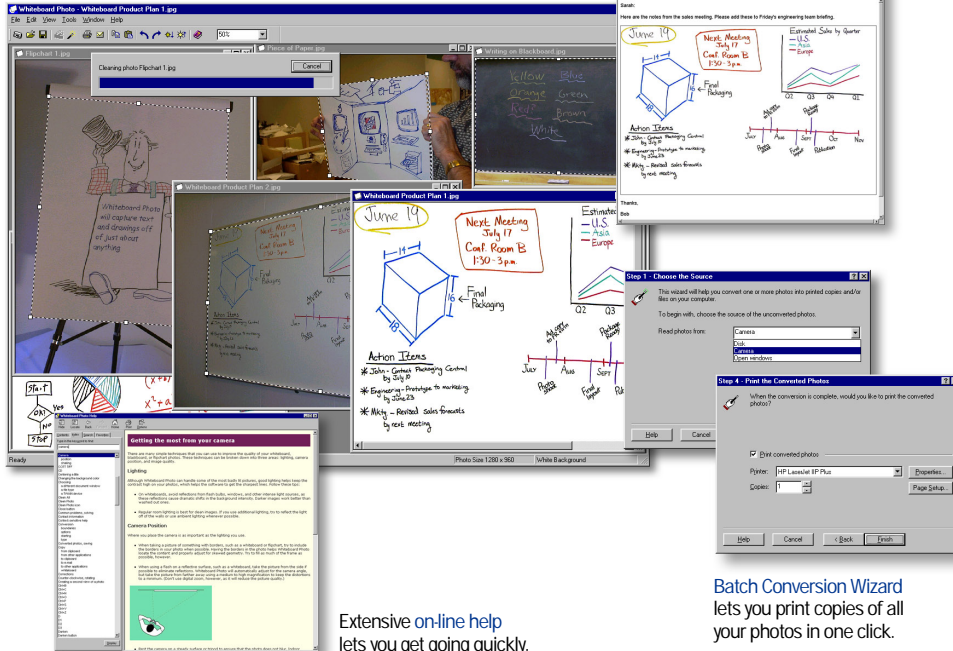

whiteboardphoto™

In fewer than 30 seconds, you can turn any digital photo of a whiteboard, flipchart, chalkboard, or overhead projection into brilliant, full-color hardcopies.

Automatic border detection finds the edges of your document as you load the photo.

Built-in support for all popular e-mail programs.

Extensive on-line help lets you get going quickly.

Batch Conversion Wizard lets you print copies of all your photos in one click.

Save Time and Money.

- Avoid taking notes after your meetings.
- Significantly less expensive than any other whiteboard capture solution, including electronic copyboards and electronic whiteboards.
- It's portable! Bring your camera from meeting room to meeting room.
- Save time preparing meeting notes by not having to retype. Works directly with OCR software.
- Batch Conversion Wizard provides convenience and speed when converting multiple photos.

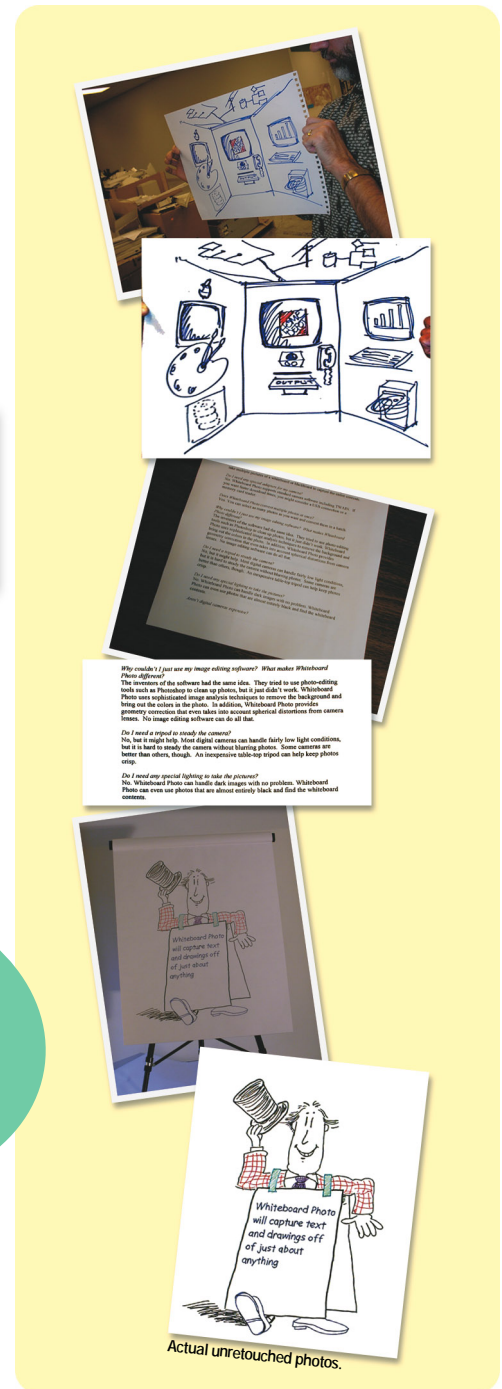

Get Perfect Pictures.

- Automatic color enhancement assures vivid pen colors.
- Automatic geometry adjustment corrects for off-angle photos and lens effects.
- Works with any camera through the TWAIN interface or Explorer.
- Open and save pictures in bitmap (.BMP), JPEG (.JPG), Targa (.TGA), CCITT TIFF (.TIF), Windows Metafile Format (.WMF), Enhanced Windows Metafile Format (.EMF), or Paintbrush (.PCX) format.
- Rotate photos in 90-degree increments.
- Line-art conversion for black and white printing.
- Invert background to convert blackboard photos for printing or whiteboard photos for high-contrast presentations.
- Automatic and manual contrast enhancement recovers even the dimmest photos.

Satisfaction Guaranteed!

If you are not completely satisfied with this product, notify us within 30 days of purchase and we will refund your money in full. Call 1-800-215-5127 for return information.

Perfect for classrooms and meetings!

Why couldn't I just use my image editing software? What makes Whiteboard Photo different?
The success of the software had the same idea. They tried to use photo-editing tools such as Photoshop to clean up photos, but it just didn't work. Whiteboard Photo uses sophisticated image analysis techniques to remove the background and bring out the colors in the photos. It also uses automatic geometric distortions from camera lenses. No image editing software can do all that.

Do I need a tripod to steady the camera?
No, but it might help. Most digital cameras can handle fairly low light conditions, but it is hard to steady the camera without shaking photos. Some cameras are better than others, though. An inexpensive table-top tripod can help keep photos sharp.

Do I need any special lighting to take the pictures?
No. Whiteboard Photo can handle dark images with no problem. Whiteboard Photo can even use photos that are almost entirely black and find the whiteboard content.
