

Bring out creativity and get opinions with the interactive whiteboard

PointTech

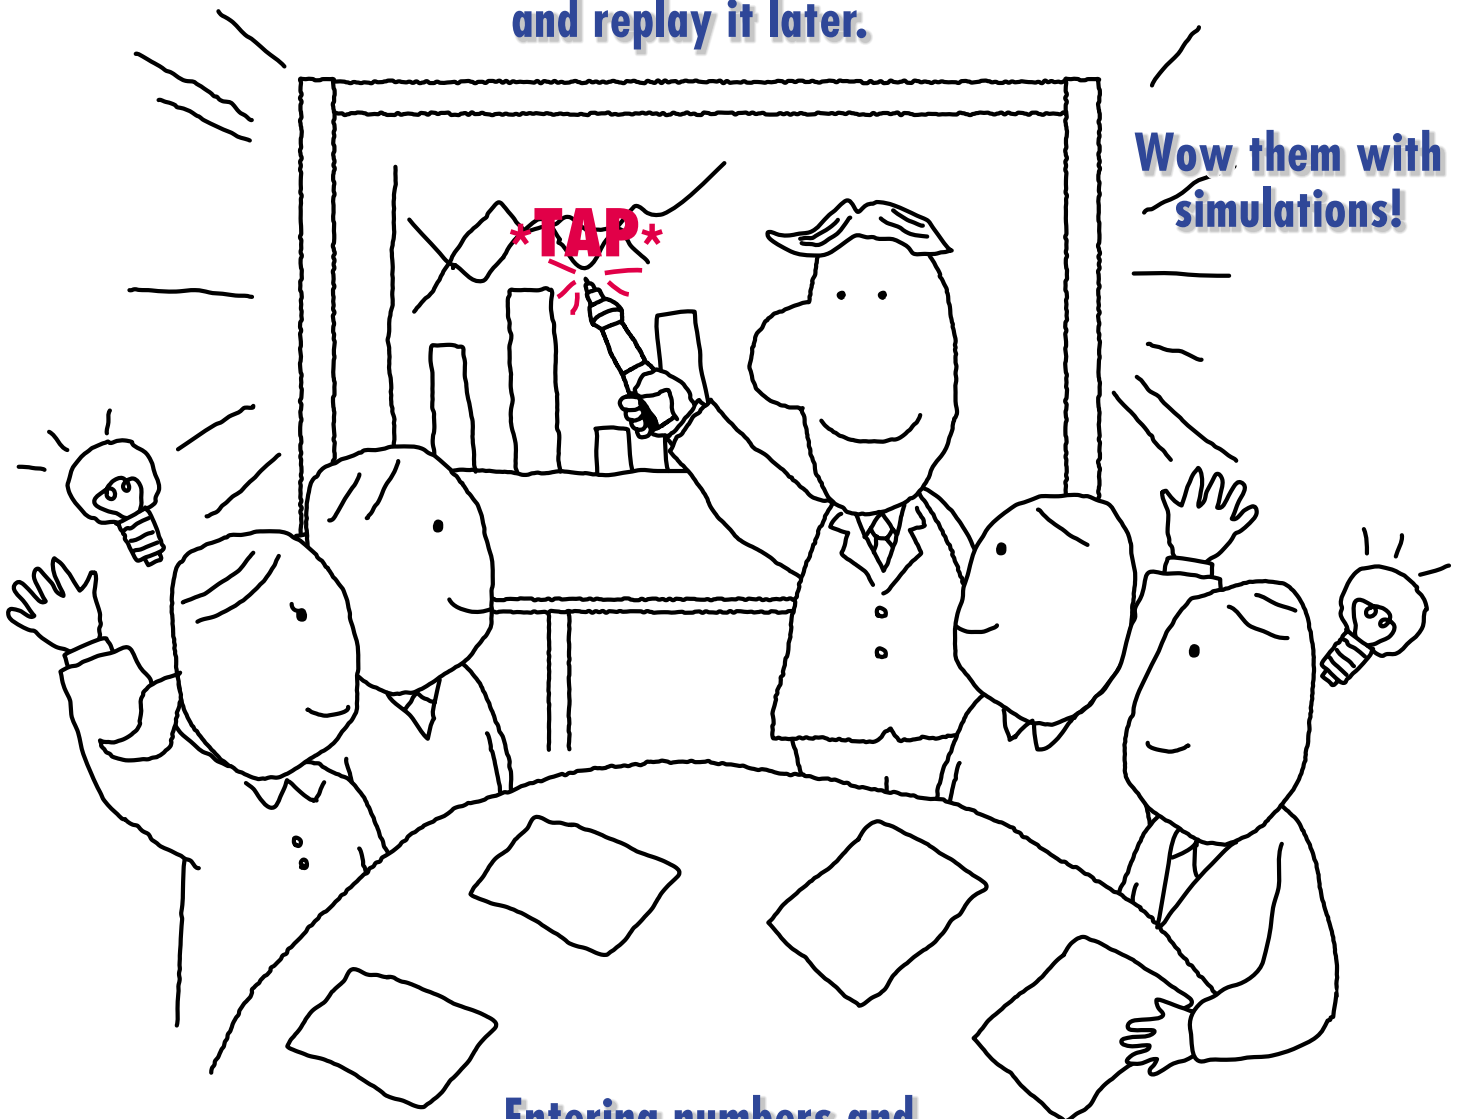

NEW

More ideas per click.

Instantly incorporate participants' ideas.

Save what you write on the board on your PC, and replay it later.

Use mouse clicks on the board!

Wow them with simulations!

Entering numbers and text is a breeze.

PoinTech Features.

The essential tool for effective presentations that keep your audience glued to their seats.

In Interactive Mode

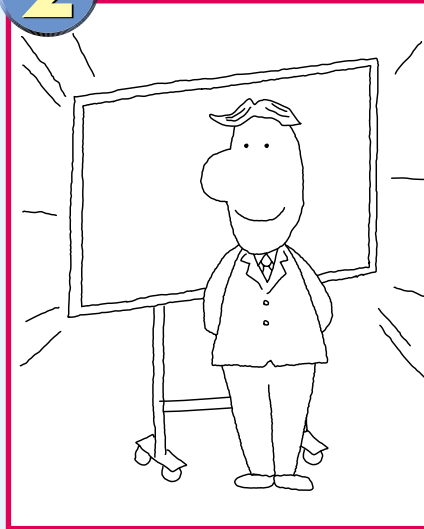

The secret weapon for presentations

1

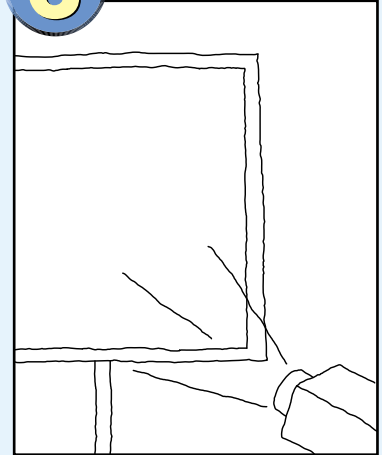

The power of your presentation is cut in half when you are chained to your PC. The talk loses its interactivity, and the audience lacks enthusiasm. You can't gauge your audience's reactions.

2

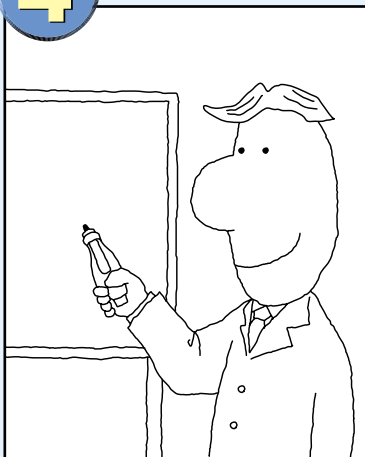

Leave it to PoinTech

3

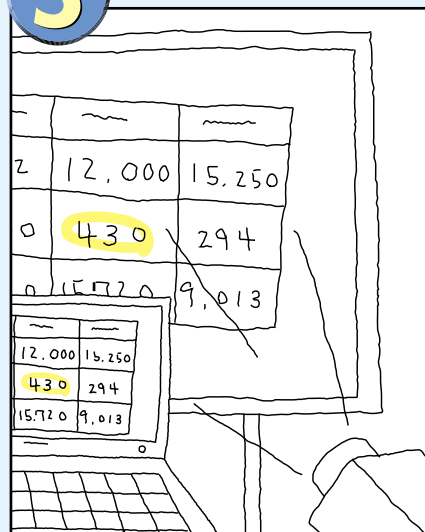

Display the screen on the board using a projector. Operate the board just as you would the screen on your PC.

4

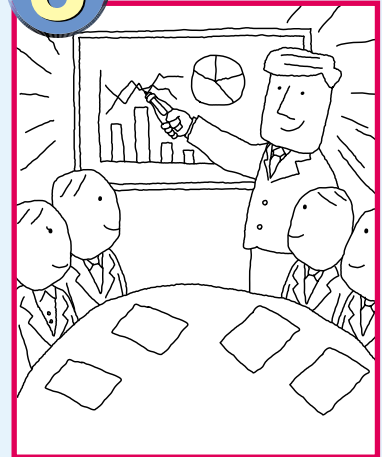

Operate familiar applications with the Stylus (supplied pen). Mouse clicks are as easy as a tap of the Stylus.

5

Write on to the screen to spice up your presentations.

6

PoinTech will have your audience glued to their seats. PoinTech is revolutionizing presentations.

- The audience focuses on you and your presentation. Audience participation soars.
- Get discussions going by sharing information.
- Your talk goes smoothly, since you can gauge audience reaction as you speak.
- Easy to store changes to data on your PC.

**Presentations are a
success!!**

Now this is cool.

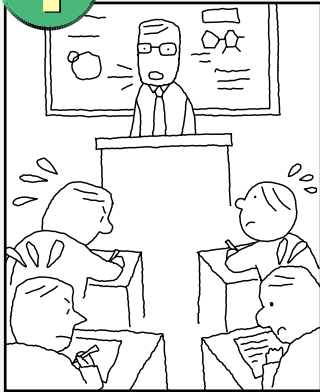

Keeping it simple is the key to drawing people in.
The essential tool for a popular class.

In Real-Time Mode

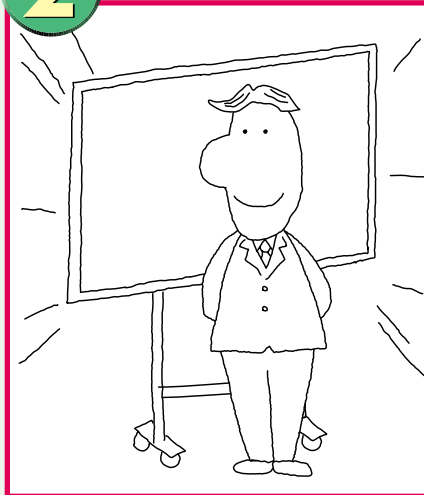

Your Key to Popular Seminars

1

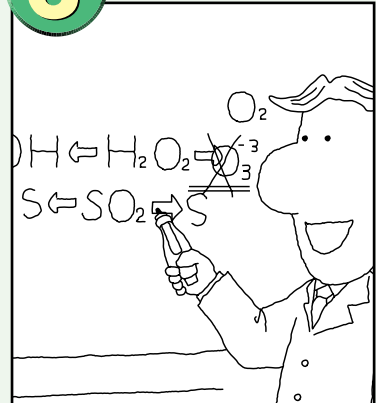

It's all they can do to take down notes.
If you miss something, it becomes nearly impossible to follow the lecture.
Not being able to understand takes away your concentration.

2

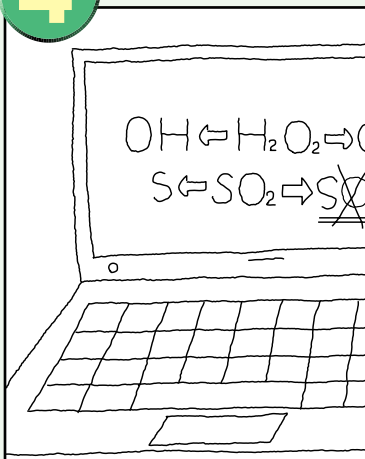

Leave everything to
PoinTech

3

Use PoinTech to convert what you write into digital format in real time.
Use the marker to write text and draw diagrams to your heart's content.
Use the eraser to delete unwanted text and drawings.

4

Store what you wrote on the board in the order you wrote it, and reproduce it at will.

5

Save what you wrote on the board to a file.
Your attendees can use it for review.
People who missed the seminar will also breathe a sigh of relief.

6

Combine this with the optional sound application to create a perfect reproduction of your seminar.

- What you write on the board is saved to a file, so students can concentrate on the seminar.
- Repeat the lecture as many times as necessary. Give copies of the file to people who missed the lecture.
- Save and use what you write on the board as living teaching materials.
- Combine with sound application (optional/sold separately) to create a perfect reproduction of your seminar.

The popularity of your seminar
**will go through
the roof!**

Interactive Mode

Display the computer screen on the board with a projector

- Operate any type of software from the board. Win over your audience at that big presentation.

Fully operate the same software you use on your PC: word processing programs, spreadsheets, web browsers, and more. There is no more need to be chained to your PC. Use the Stylus (supplied pen) to click, double-click, right-click, and enter numbers and text right from the board. Presentations are a piece of cake, because you can gauge audience reaction as you go.

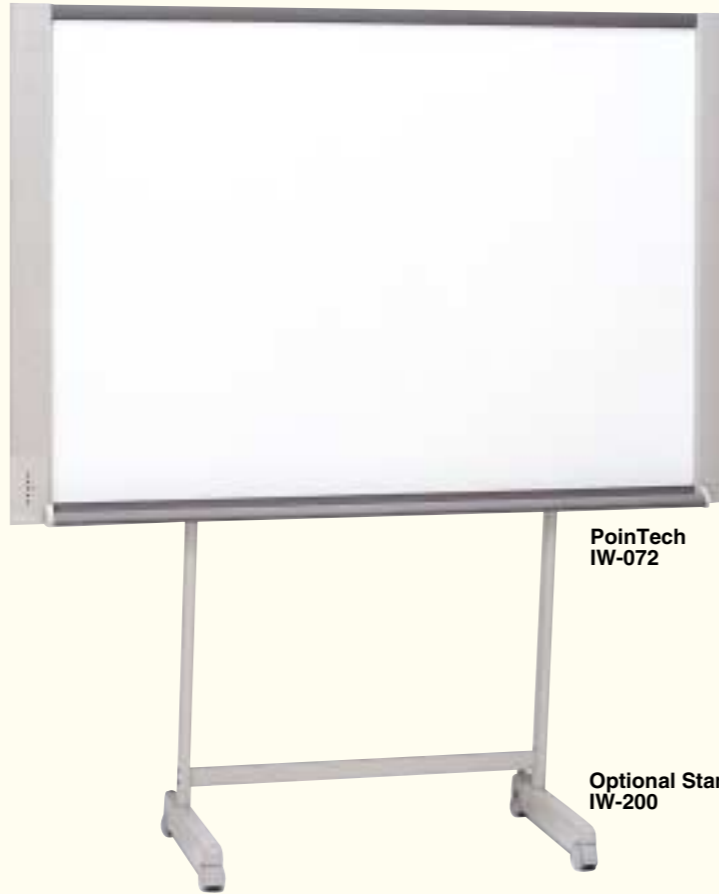

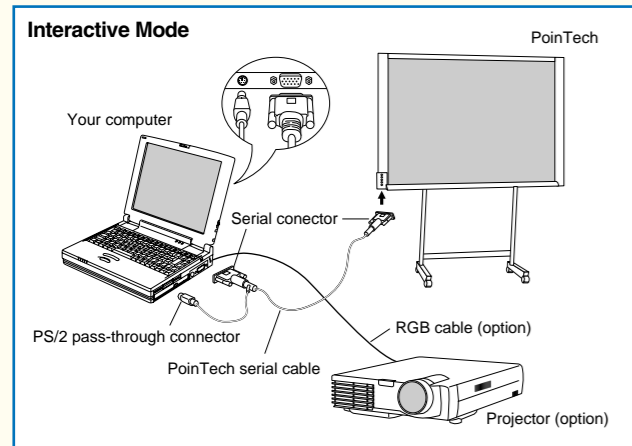

- Write onto the computer screen display. Print or save what you write on the board, or send it to someone else.

You can draw lines for emphasis, write text, and draw figures on the projected computer screen. You can also save what you have written to a connected PC*, giving you an effective minute-taking tool. Keep distant divisions in touch by emailing them the data you have saved.

* JPEG and BMP formats supported.

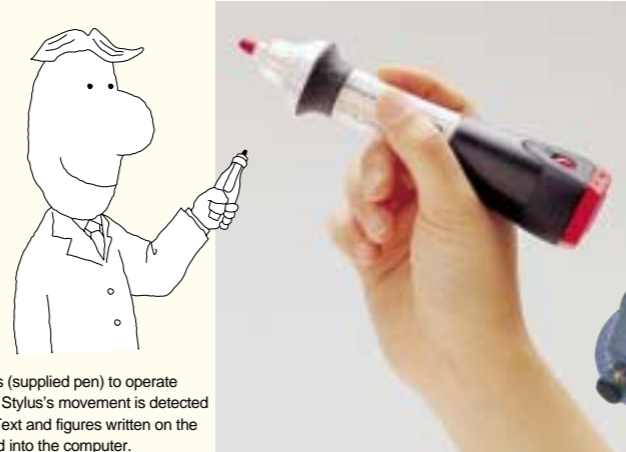

- Setup is a snap – prepare instantly in any situation.

Connect PoinTech to your PC (USB or PS/2), and project the computer screen onto the board with a projector. The big 72-inch board gives you plenty of space. Setting up is a snap – just project an image onto the screen and align it.

PoinTech IW-072

Optional Stand IW-200

Use the Stylus (supplied pen) to operate software. The Stylus's movement is detected by a sensor. Text and figures written on the board are read into the computer.

● PoinTech Eraser

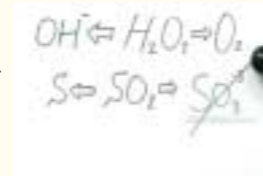

Real-Time Mode

Use the marker to write just like a whiteboard

- Display contents of the board on your PC in real time. Save text and drawings onto your PC in the order you write them.

Display what you write on the board as-is on a connected computer in real time, and save it in the order you write it*. Attach saved files to email, or leave them on a server for people to download and play back. The uses for these files are limited only by your own imagination.

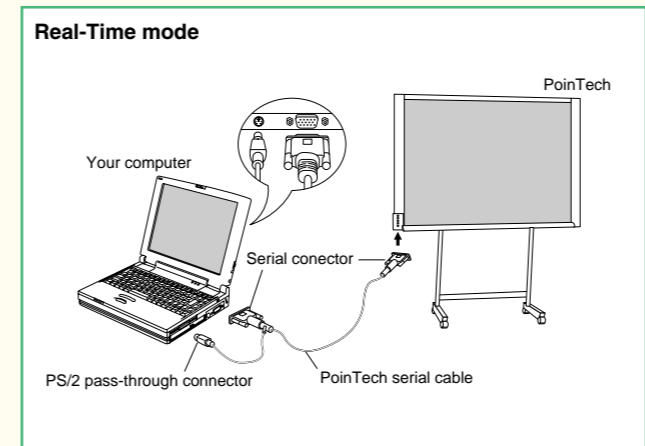

* ink file format (application format) supported. Can also save in HTML, JPEG, BMP, WMF, or EMF (Windows extended metafile) formats.

- Combine with sound application* to save and play back sound with your files.

Save audio from meetings and seminars together with board contents in compressed format. Play back the file with sound to feel like you are actually at the meeting/seminar.

* Use boardCast optional software (sold separately).

SCENE 1 A Company Conference Room

Create a new conference culture at all types of meetings: planning, budget, management, development, and more. Actively incorporating everyone's knowledge and creativity makes it easy to build a consensus at meetings.

SCENE 2 A Computer Classroom

PoinTech is the essential tool for learning how to use software in a computer classroom. Students learn how to perform operations just by glancing at the computer screen projected onto the board. Even complete beginners will understand instantly, mastering the program in no time.

SCENE 3 A Presentation or Demonstration

You can use PoinTech to instantly incorporate audience comments into your presentation. This gives a big boost to everyone's concentration. It's easy to operate all your favorite software on the big 72-inch screen. Also great for powerful web site demonstrations.

SCENE 4 A Training Facility

More and more, projectors and PCs are being incorporated into seminars. Adding PoinTech to these will make your seminars even easier to understand. Using a network makes it easy to send and receive board files, and share data.

SCENE 5 A University or Vocational School

Save and play back what you have written on a PC to provide on-demand review and supplementary information.

Here are some examples of what you can do with the PoinTech software.

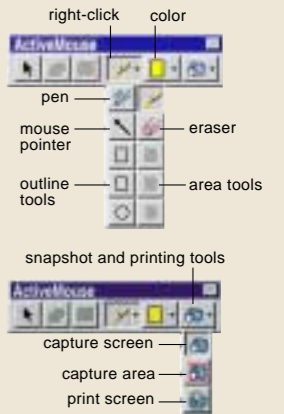

In Interactive Mode

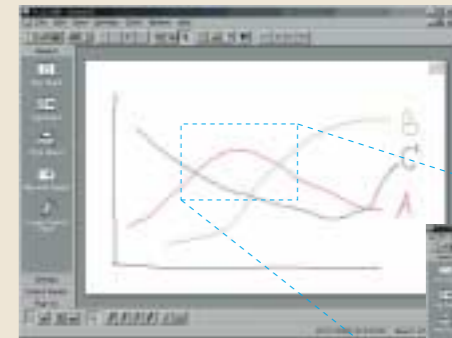

Supports presentations with a myriad of tools. Draw lines, save part of the screen, and more.

The ActiveMouse Toolbar

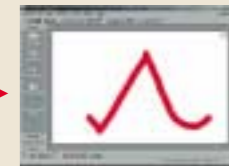

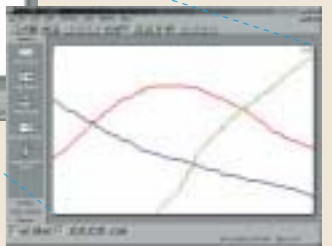

In Real-Time Mode

Zoom parts of the screen!

Flawless support for saving small text and drawings written on the board as data. Zoom in to make sure of fine details.

Save what you write in the order you write it!

What you write on the board is saved to your PC in the order you write it. When you play back the file, you can find out what went on at the meeting or training.

The supplied software has many more features.
